

## Fair Price Guarantee

If you get a lower price from a competitor and they are providing a comparable service and product (to be determined by the 5 criteria listed below), we will try to match their price. If we are unable to match their price, we will give you a \$100.00 gift certificate to your favorite restaurant.

### Criteria

1. Are they registered and a licensed contractor with the State of Wisconsin? To verify, call The Dept. of Commerce, Safety & Buildings Division at 608-261-8500.

2. Carries Liability Insurance (in case they damage your property)

Carries Worker's Compensation Insurance (in case their people get hurt on your property)

To verify, request the contractor to have their insurance company mail you a Certificate of Insurance then make sure the boxes are checked for Liability and Worker's Compensation Insurance.

3. Upgrade Products – Every manufacture has different quality levels of ice shield, underlayment, and shingles.

To verify, the proposal/contract should list the manufacture and model of each product then call a material supplier or look online to see if they are specifying standard products or upgrade products.

4. Every roofing material manufacture has a certification program for companies that sell and install their products. To become certified, you are required to take manufacture training.

To verify, request a copy of their certificate.

5. Are we estimating the same square footage? If one contractor estimate says your roof is 2,800 sq. ft. and a different contractor estimate says your roof is 3,100 sq. ft., this is obvious discrepancy that needs to be resolved in order to have a fair comparison.

For your information, our certification/license numbers are listed below:

Dwelling Contractor Certification	#1154056
Dwelling Contractor Qualifier Certification	#255091
